

## CLAIM LISTING

The following claim listing replaces the prior claim listing and reflects all presently pending claims:

1-20 (Canceled)

21. (Previously Presented) A method for timed text display on a communications device, said method comprising:

- controlling a display of a communications device using a Subscriber Identity Module (SIM) application; and

- specifying a minimum duration in said SIM application for which text must be displayed;

- wherein the minimum duration must lapse prior to permitting a user to clear said text.

22. (Previously Presented) The method of claim 21, wherein said step of specifying a duration comprises setting the value of a duration data object for a DISPLAY TEXT command in said SIM application.

23. (Previously Presented) The method of claim 21, further comprising:

- displaying text on said communications device;

- receiving a command to clear said text;

- if said specified duration has elapsed, then executing said command.

24. (Previously Presented) The method of claim 22, wherein said duration data object is a parameter in said DISPLAY TEXT command.

25. (Previously Presented) The method of claim 23, further comprising:  
if said specified duration has not elapsed, then disregarding said command.
26. (Previously Presented) The method of claim 23, wherein the step of displaying text comprises displaying any of the following: letters, numbers, words, icons, images, pictures.
27. (Previously Presented) A computer-readable medium comprising computer-executable instructions, which, when executed, cause a computer to perform the steps of:  
controlling a display of a communications device; and  
specifying a minimum duration for which text must be displayed;  
wherein the minimum duration must lapse prior to permitting a user to clear said text.
28. (Previously Presented) The computer-readable medium of claim 27, wherein said step of specifying a duration comprises setting the value of a duration data object for a DISPLAY TEXT command.
29. (Previously Presented) The computer-readable medium of claim 27, further comprising:  
displaying text on said communications device;  
receiving a command to clear said text;  
if said specified duration has elapsed, then executing said command.
30. (Previously Presented) The computer-readable medium of claim 28, wherein said duration data object is a parameter in said DISPLAY TEXT command.

31. (Previously Presented) The computer-readable medium of claim 29, further comprising:

if said specified duration has not elapsed, then disregarding said command.

32. (Previously Presented) The computer-readable medium of claim 29, wherein the step of displaying text comprises displaying any of the following: letters, numbers, words, icons, images, pictures.

33. (Previously Presented) An apparatus for displaying timed text, said apparatus comprising:

a Subscriber Identity Module (SIM) comprising a memory, said memory being configured to store a SIM application;

said SIM application configured to specify a minimum duration in the SIM application for which text must be displayed and

a display device for presenting said text to a user of the apparatus;

wherein the minimum duration must lapse prior to permitting a user to clear said text.

34. (Previously Presented) The apparatus of claim 33, wherein said SIM application comprises a duration data object for a DISPLAY TEXT command.

35. (Previously Presented) The apparatus of claim 33, wherein said SIM application is further configured to:

receive a command to clear said text; and

execute said command, if said duration has elapsed.

36. (Previously Presented) The apparatus of claim 34, wherein said duration data object is a parameter in said DISPLAY TEXT command.

37. (Previously Presented) The apparatus of claim 35, wherein said SIM application is further configured to disregard said command, if said duration has not elapsed.

38. (Previously Presented) The apparatus of claim 35, wherein said text comprises any of the following: letters, numbers, words, icons, images, pictures.
